EXPERIENCE

ACCOUNT ASSISTANT

Knight Rider Delivery Services LLC - Dubai/UAE

11/2021 - 06/2022

- Assisted the finance department with various accounting tasks, including accounts payable and receivable, invoicing, and expense tracking.
- Prepared and maintained accurate financial records and reports, ensuring compliance with company policies and accounting standards.
- Collaborated with team members to reconcile accounts, resolve discrepancies, and ensure timely payments to vendors and clients.

UNITY 3D DEVELOPER - INTERN

RootPointers

02/2023 - 06/2023

- Assisted in the development of Unity 3D games and applications, focusing on basic scene creation, asset integration, and C# scripting.
- Collaborated with senior developers to implement gameplay mechanics, user interfaces, and animations.
- Conducted testing and troubleshooting to identify and fix bugs and improve overall game performance.

EDUCATION

MATRICULATION

Unique Group of Institition, Lahore

CERTIFICATES

Advance Front-End Development - PNY Institute (Arfa-Tower)

01/2023 - 05/2023

Enrolled in React JS course at PNY institute to gain comprehensive knowledge and practical skills in building dynamic user interfaces. Learn from experienced instructors, work on real-world projects, and receive a certificate upon completion, boosting my career prospects in Front-End Development

REACT JS PROJECTS

1) CALCULATER

- Developed a web-based calculator using React.js that performs basic arithmetic operations such as addition, subtraction, multiplication, and division.
- The calculator provides a user-friendly interface and supports both keyboard and mouse input.
- Technologies Used: (React.js, HTML5, CSS3)

2) RANDOM QUOTE GENERATOR

- Created a random quote generator Website using React.js that displays inspiring quotes fetched from an API. The application provides a new quote with each button click.
- Technologies Used: (React.js, HTML5, CSS3, Axios, RESTful APIs)
- **Link: https://shujahaider49.github.io/quote-gene-web**

3) WEATHER APP

- Built a responsive weather application using React.js that fetches real-time weather data from a openweathermap API and displays it in a user-friendly format. Users can search for weather information by entering a city or location name.
- Technologies Used: React.js, HTML5, CSS3, Axios, openweathermap APIs
